JOURNAL OF QUANTITATIVE SPECTROSCOPY & RADIATIVE TRANSFER

Editor
Professor S. S. Penner, *University of California/San Diego, 9500 Gilman Drive, La Jolla, CA 92093-0310, U.S.A.*

Associate Editors

Term ending 31 December 1991

D. Burgess, *Department of Physics, Imperial College of Science and Technology, London, U.K.*

H. Domke, *Central Institute for Astrophysics, 1591 Potsdam, Germany*

H. W. Drawin, *Association EURATOM-CEA, D.R.F.C., CEN-CADARACHE, BP. 1, F-13108 - St Paul Les Durance Cedex, France*

K. Fox, *Department of Physics and Astronomy, University of Tennessee, Knoxville, TN 37996-1200, U.S.A.*

H. R. Griem, *Department of Physics and Astronomy, University of Maryland, College Park, MD 20740, U.S.A.*

P. Kunasz, *Joint Institute for Laboratory Astrophysics, University of Colorado, Boulder, CO 80302, U.S.A.*

B. R. Lewis, *Research School of Physical Sciences, The Australian National University, Canberra, Australia 2600*

G. Münch, *Direktor, Max-Planck-Institut für Astronomie, 6900 Heidelberg 1, Königstuhl, Deutschland*

R. W. Nicholls, *Centre for Research in Experimental Space Sciences, York University, 4700 Keele Street, Downsview, Ontario, Canada M3J 1P3*

G. C. Pomraning, *MANE Department, 38-137H Engineering IV, UCLA, 405 Hilgard Avenue, Los Angeles, CA 90024-1597, U.S.A.*

N. N. Sobolev, *P. N. Lebedev Physical Institute of the U.S.S.R. Academy of Sciences, Leninsky Prospect 53, Moscow, U.S.S.R.*

B. van der Sijde, *Eindhoven University of Technology, Department of Physics, P. O. Box 513, 5600 MB Eindhoven, The Netherlands*

W. L. Wiese, *National Measurements Laboratory, National Bureau of Standards, Washington, DC 20234, U.S.A.*

Term ending 31 December 1992

G. Birnbaum, *National Bureau of Standards, Office of Nondestructive Evaluation, Building 223, Room B344, Gaithersburg, MD 20899, U.S.A.*

Y. Ben-Aryeh, *Department of Physics, Technion-Israel Institute of Technology, 32000 Technion City, Haifa, Israel*

J. Cooper, *Joint Institute for Laboratory Astrophysics, University of Colorado, Boulder, CO 80309, U.S.A.*

R. K. Hanson, *High Temperature Gasdynamics Laboratory, Department of Mechanical Engineering, Stanford University, Stanford, CA 94305, U.S.A.*

P. Heinzel, *Astronomical Institute of the Czechoslovak Academy of Sciences, 251 65 Ondrejov, Czechoslovakia*

K. Kamiuto, *Solar Energy Thermal Applications Laboratory, Oita University, Dannoharu 700, Oita 870-11, Japan*

D. Robert, *Laboratoire de Physique Moléculaire, CNRS UA 772, Université de Franche-Comté, 25030 Besançon Cedex, France*

H. K. Roscoe, *Natural Environment Research Council, British Antarctic Survey, High Cross, Madingley Road, Cambridge CB3 0ET, U.K.*

H. Schlüter, *Institut für Experimentalphysik, Ruhr-Universität Bochum, Gebäude NB 5/131, 4630 Bochum 1, Deutschland*

I. I. Sobelmann, *P. N. Lebedev Physical Institute of the U.S.S.R. Academy of Sciences, Leninsky Prospect 53, Moscow, U.S.S.R.*

C. L. Tien, *Chancellor, University of California, Berkeley, CA 94720, U.S.A.*

Term ending 31 December 1993

G. Baldacchini, *ENEA CRE Frascati, C.P. 65, 00044-Frascati, Rome, Italy*

J. P. Bouanich, *Laboratoire d'Infrarouge Associé au C.N.R.S., Université de Paris-Sud, Bâtiment 350, 91405 Orsay Cedex, France*

M. Cattani, *Instituto de Fisica da Universidade de São Paulo, C. P. 20516, São Paulo, Brazil*

A. L. Crosbie, *Thermal Radiative Transfer Group, Department of Mechanical and Aerospace Engineering, University of Missouri-Rolla, Rolla, MO 65401, U.S.A.*

J. Davis, *Plasma Dynamics Branch, Naval Research Laboratory, Washington, DC 20375, U.S.A.*

R. W. Lee, *Lawrence Livermore National Laboratory, P. O. Box 808, Livermore, CA 94550, U.S.A.*

R. May, *Jet Propulsion Laboratory, 4800 Oak Grove Drive, Pasadena, CA 99109, U.S.A.*

J. Migdałek, *Institute of Physics, Pedagogical University of Krakow, 2 Podchorazyck Street, 30-084 Krakow, Poland*

D. Mihalas, *Department of Astronomy, University of Illinois, 103 Astronomy Building, 1002 West Green Street, Urbana, IL 61801, U.S.A.*

O. Peyrusse, *Centre d'Etudes de Limeil-Valenton, Commissariat à l'Energie Atomique, 94195 Villeneuve-St-Georges Cedex, France*

J. M. P. Serrão, *Centro de Fisica Molecular das Universidades de Lisboa I.N.I.C., Complexo I, Ave. Rovisco Pais, 1000 Lisboa, Portugal*

C. E. Siewert, *Department of Mathematics, North Carolina State University, Raleigh, NC 27695-8205, U.S.A.*

P. Varanasi, *Institute for Terrestrial and Planetary Atmospheres, State University of New York, Stony Brook, NY 11794-2300, U.S.A.*

W. Whaling, *Department of Physics, California Institute of Technology, Pasadena, CA 91125, U.S.A.*

Publishing Office: Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England (*Tel.* Exeter (0392) 51558; *Fax* 425370).

Subscription and Advertising Offices: *North America:* Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.; *Rest of the World:* Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England (*Tel.* Oxford (0865) 794141). **Subscription Rates:** annual institutional subscription rate (1991) DM 1710.00; 2-year institutional rate (1991/92) DM 3249.00; a personal subscription rate for those whose library subscribes at the regular rate is available on request. Subscription rates for Japan include despatch by air and prices are available on application. Prices are subject to amendment without notice. **Back Issues:** Back issues of all previously published volumes, in both hard copy and in microform are available direct from Pergamon Press offices.

Published Monthly—Two volumes per annum. Copyright © 1991 Pergamon Press plc

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Photocopying information for users in the U.S.A.: The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, U.S.A. **Permission for other use:** The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying. *The Item-fee Code for this publication is* 0022-4073/91 $3.00 + 0.00

♾™ The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

List of Contents

NUMBER 1

A. T. M. Wilbers, G. M. W. Kroesen, C. J. Timmermans, and **D. C. Schram**	1	The continuum emission of an arc plasma
H. G. Adler and **A. Piel**	11	Stark-broadening of the helium lines 447 and 492 nm at low electron densities
Xun Zhu	33	Spectral parameters in band models with distributed line intensity
L. G. Stenholm, H. Störzer, and **R. Wehrse**	47	An efficient method for the solution of 3-D radiative transfer problems
Note		
Suresh Chandra, V. P. Gaur, and **M. C. Pande**	57	Partition functions of the H_3^+ molecular ion
Corrigendum	61	

NUMBER 2

C. Peraza, P. Martín, and **J. Campos**	63	Transition probabilities of infrared lines $6p$–$6s$ and $5p$–$4d$ of Kr(I)
Christine H. Hearn and **Jeffrey A. Joens**	69	The near u.v. absorption spectrum of CS_2 and SO_2 at 300 K
T. J. Xia, T. S. Chien, C. Y. Robert Wu, and **D. L. Judge**	77	Photoabsorption and photoionization cross sections of NH_3, PH_3, H_2S, C_2H_2, and C_2H_4 in the VUV region
K. Kamiuto, M. Iwamoto, M. Sato, and **T. Nishimura**	93	Radiation-extinction coefficients of packed-sphere systems
Y. Hasegawa, T. Gejo, K. Tsuji, H. Yamasaki, and **S. Shioda**	97	Relation between number densities and total absorption of second-resonance doublets of potassium in potassium–argon mixtures
P. M. Bergström, Jr., Longhuan Kim, and **R. H. Pratt**	105	Average atom and detailed configuration accounting calculations of bremsstrahlung in aluminum plasmas
Ding Peizhu, Mu Yingkui, and **Pan Shoufu**	115	An interpolation solution of the Abel transformation for use in optically-thick, cylindrically-symmetric plasmas
José Manuel P. Serrão	121	Absorption spectrum of singly-ionized aluminum

NUMBER 3

Flemming Andersen	127	Error estimates for use of the generalized radiation diffusion equation near boundaries
W. A. Lahoz	133	On the exact linearization and decoupling of coupled non-linear integral equations arising in radiative transfer theory
Jun Shan, Masako Suto, Y. G. Jin, and **L. C. Lee**	139	Infrared emission from dissociative excitation of $HONO_2$ at 193 nm
D. Lambot, A. Olivier, G. Blanquet, J. Walrand, and **J. P. Bouanich**	145	Diode-laser measurements of collisional line broadening in the ν_5 band of C_2H_2
A. Goly, J. Kusz, B. Nguyen Quang, and **S. Weniger**	157	Transition probabilities of PrII-lines emitted from a ferroelectric plasma source
V. I. Kruglov and **K. V. Dobrego**	165	Determination of inhomogeneous gas radiation by using exponential expansion of the intensity integral Padé-approximant
B. Grabowski, A. Czaiński, and **M. S. Dimitrijević**	181	Effect of back reaction on broadening of atomic spectral lines in the impact approximation

NUMBER 4

D. C. Eder and **H. A. Scott**	189	The calculation of line transfer in expanding media
A. L. Crosbie and **S. M. Shieh**	205	Expansions for two-dimensional back-scattering from a semi-infinite medium with refractive index greater than unity
D. G. Hummer	211	Asymptotic expansions of the kernel functions for line formation with continuous absorption
F. E. Irons	217	Concerning a constant source function method of radiative transfer
G. Mehlman, P. G. Burkhalter, D. A. Newman, and **B. H. Ripin**	225	Soft X-ray continuum from laser-irradiated high-Z targets
S. A. El-Wakil, M. T. Attia, and **M. A. Madkour**	235	Radiative transfer in spherical and cylindrical media containing aerosols
Note		
Ramazan Sever and **Cevdet Tezcan**	245	Hypervirial large-N expansion approach to the Hulthén potential

NUMBER 5

J. Bergeat and **B. Rutily** — 251 The Neumann solution of the multiple scattering problem in a plane-parallel medium: numerical calculations and the half-space problem

R. W. Nicholls — 261 Franck–Condon factor sum rules for transitions involving bound and unbound states

Randy D. May — 267 Absolute linestrengths in the H_2O_2 ν_6 band

C. E. Siewert and **J. R. Thomas, Jr.** — 273 A computational method for solving a class of coupled conductive–radiative heat transfer problems

V. P. Bellary and **T. K. Balasubramanian** — 283 Rotational line-strengths in the $^3\Sigma^{\pm}$–$^3\Sigma^{\mp}$ orbitally forbidden electric dipole transitions

A. I. Nadezhdinskii, E. V. Stepanov, A. A. Suvernev, and **S. I. Temkin** — 291 Line interference of randomly distributed spectral components

Notes

L. Bonamy, D. Robert, J. Boissoles, and **C. Boulet** — 305 Determination of ECS scaling parameters for CO_2–CO_2 and CO_2–N_2

M. F. Modest — 309 Oblique collimated irradiation of an absorbing, scattering, plane-parallel layer

NUMBER 6

Richard Sanchez and **G. C. Pomraning** — 313 A family of flux-limited diffusion theories

Benoist E. Grossmann and **Edward V. Browell** — 339 Line-shape asymmetry of water vapor absorption lines in the 720-nm wavelength region

José Manuel P. Serrão — 349 Absorption spectrum of doubly-ionized silicon

R. R. Nigmatullin, N. K. Shcherbakova, and **M. Kh. Salakhov** — 355 An algorithm for determining dispersion and Doppler line widths from limited experimental data

D. Karabourniotis, E. Drakakis, and **A. Palladas** — 359 Application of Bartels' approximations in optically-thin line spectroscopy

A. Kh. Khachatrian, A. A. Hakopian, and **E. A. Melkonian** — 367 A matrix solution method for non-coherent scattering problems
